

Catalyst™

# Catalyst Wedges

## TOOLS THAT MOVE PAINT

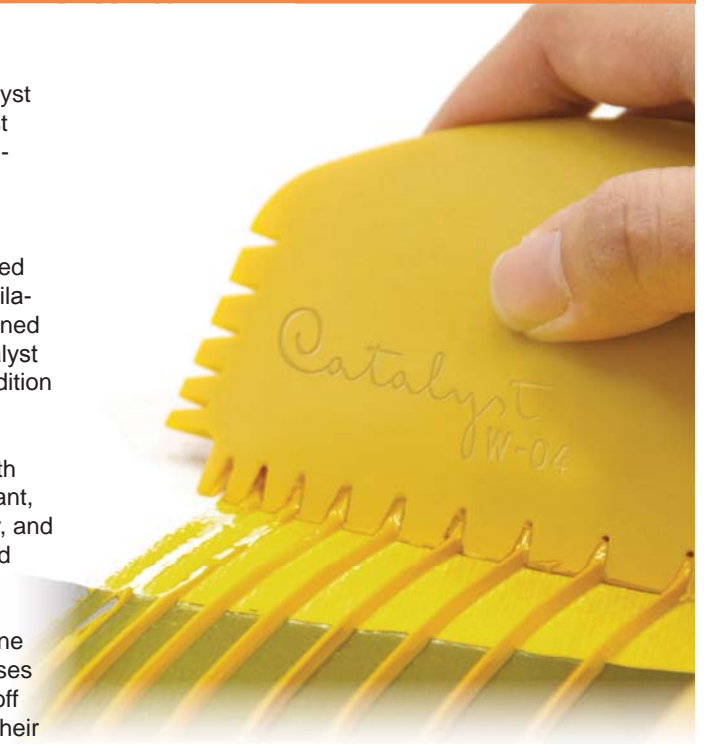

Catalyst is an innovative new line of creative tools for artists. Catalyst Polytip Bristle brushes are super stiff, but truly responsive. Catalyst Blades and Wedges are a new kind of tool made of engineered silicone.

## CATALYST BLADES & WEDGES

Not quite a brush. Not quite a palette knife. Catalyst tools are crafted from flexible silicone to allow artists a new form of expression. Available in two unique styles: Catalyst Wedges are ergonomically designed to fit in your hand allowing a direct interaction with your work. Catalyst Blades are mounted on artist brush handles offering a blend of tradition and innovation.

Designed for use with heavy-bodied paints, Catalyst is at home with oils, acrylics, and watermiscible oils. Because they are heat-resistant, they excel with encaustics. Artists are using them with plaster, clay, and even frosting. Made of FDA-approved silicone, Catalyst Blades and Wedges are great for food crafting.

Clean-up is a breeze with Catalyst Blades and Wedges. The silicone is easy to wipe clean and is solvent resistant. Clean up in most cases can be done with mild soap and water. Dried paint can be peeled off the silicone surface. Catalyst blades can even be separated from their wood handles for cleaning and easily replaced when dry.

# Catalyst Mini-Blades

Catalyst tools now come in Mini-Blades and Contours. Made out of nylon and silicone that is heat-resistant, solvent-resistant, dishwasher safe, and approved food-safe by the FDA. These great features combined with their new shapes and convenient sizes allow for extensive creativity with cake decorating, foodcrafting, ceramic, plaster, and heavy acrylic mediums.

Clean-up is a breeze with Catalyst Contours. The silicone is easy to wipe clean and is solvent resistant. Clean up in most cases can be done with mild soap and water. Dried paint can be peeled off the silicone surface. Catalyst blades can even be separated from their wood handles for cleaning and easily replaced when dry.

# Catalyst Polytip Bristle

## Polytip Bristle

The Catalyst Polytip Bristle brushes are super soft yet extremely responsive. Unlike natural hog bristle, catalyst synthetic has a real integrity in water. Natural bristle can be rendered useless when it is water-soaked.

Designed for use with medium to heavy bodied acrylics and oil paints Catalyst pushes even heavy gel mediums with assurance.

### Polytip - A First for Artist Brushes

The tip of each individual hair has been split to replicate the natural flags on the finest natural bristle. With each hair having 2 to 3 distinct tips, Catalyst is able to hold a higher volume of paint while providing a smoother application.
